

WeR@Home™

Installing WeR@Home™ in three easy steps

1 Set up the hub

1 Insert the battery

2 Connect to your internet router

3 Connect the power cable and plug in to a power source

4 The LED on the front of the hub lights green

2 The WeR@Home™ app

Download the WeR@Home™ iOS or Android app. Follow the on-screen instructions to register the hub. The app assigns a default PIN code of 1234.

3 Install the peripheral devices

Install the camera and motion detector

Camera

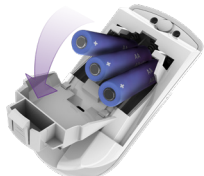

Motion Detector

1

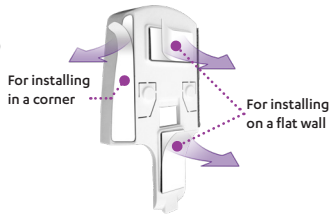

Remove the mounting base

2

Remove the back cover (camera only) and insert the batteries

3

Peel off the strips. Only use the adhesive tape needed for the installation (flat wall or corner)

4

Press the mounting base against the wall or corner and insert the device

Location:

- Between 2.1 m (6.9 ft.) to 2.3 m (7.5 ft.) high
- A clean, dry, smooth, and flat wall, or in a corner
- Spherical lens facing downward
- Not facing windows, sunlight, or a strong light source
- Within 6 m (20 ft.) of the coverage area

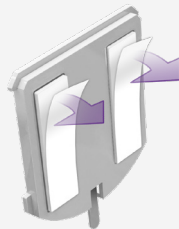

Install the siren

1

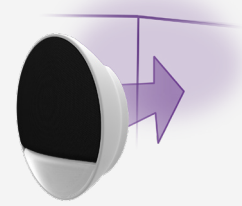

Remove the mounting base and insert the batteries

2

Replace the mounting base and peel the strips off the adhesive tape

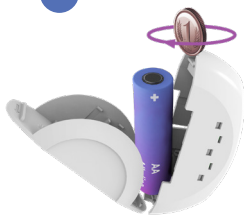

3

Press the siren against the wall

Install the door/window sensor

1

Open the sensor and insert the battery

2

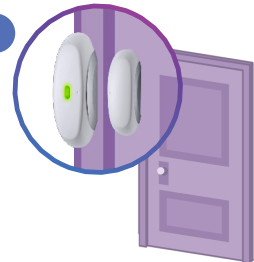

Peel off the protective strips

3

Align the two units using the dots

4

Press one unit on the door or window and the other on the frame

Register the remote control (key fob)

- 1 Press any button a few times to discharge the device
- 2 Open the battery cover
- 3 In the app, tap and then **DEVICES**.
- 4 Tap **Add device**, select **Remote Control**, and assign a user
- 5 Insert the battery and close the cover

2

5

To install additional devices: in the app, tap and then **DEVICES**. Tap **Add device**, and follow the on-screen instructions.
